PROFILE

- Fullstack software engineer with over 4 years of experience.
- Proficient in .NET, Docker, React and Angular.
- Proven experience working in start-ups and larger companies.
- Knowledge in Project, Product management and Sales.

WORK EXPERIENCE

Software Engineer | LetsGetChecked | Dublin, Ireland

January 2024 – December 2025

- Owned end-to-end delivery for over **10 major projects**, including **order-kit scanning automation, fax & letter generation**, migrating microservices from a monolith and more.
- **Designed and developed** fullstack applications using **Angular** and **ASP.NET** web-form frontends and RESTful APIs with .NET Core, including **high and low level design** significantly enhancing user experience by 70% as measured by product managers.
- Comfortable working in **Agile and Kanban methodologies**, streamlining project timelines and accelerating feature delivery from concept to production with 100% ticket completion as per JIRA.
- Conducted comprehensive **unit and integration tests** using **NUnit**, improving software reliability and performance.
- Managed and optimized data storage and retrieval across **SQL, MongoDB, and AWS DynamoDB**.
- Leveraged **AWS, Docker, and Appveyor** to build robust cloud-native applications.
- Utilized **monitoring** tools like Grafana, Pagerduty, and Splunk for proactive system health and performance management.

Full Stack Software Engineer | Cargo LLC | Kuwait City, Kuwait

June 2021 – September 2022

- Core fullstack developer working in a start-up environment, responsible for over 15 repositories including **Blazor** dashboards and **.NET APIs** handling logistics based APIs, Administrative dashboards.
- Implemented **CQRS, Event driven, Unit of work** design patterns to improve API efficiency and scalability, supporting complex business logic.
- Utilized **Ocelot for Microservices architecture**, optimizing service integration and data flow across distributed systems.
- Architected and optimized spatial databases to store and query driver GPS coordinates and delivery zones, utilizing **Mapbox** for real-time route optimization and automated geofencing.
- Expertise working in **Agile and SCRUM environment**, actively participating in sprint planning, daily stand-ups, and retrospectives.
- Designed and updated databases including **SQL** and **MongoDB** for robust data persistence.
- **Mentored and onboarded new developers**, providing training on .NET API development best practices.

EDUCATION

M.Sc. in Computer Science (Software Engineering) | Maynooth University, Ireland

September 2022 – June 2023 | CGPA: 2.1 (First class honors)

- Master's focused on advanced software development methodologies, software architecture, and design patterns.
- Thesis in UX research, Human Computer Interaction, and Data analysis.

B.E. in Computer Engineering | American University of Kuwait, Kuwait

September 2016 – June 2021 | CGPA: 3.1

- ABET-certified program with a strong foundation in hardware and software aspects of computer systems. Assembly, FPGA, Embedded system design, Networks & Signal and Systems
- Focused on programming languages (C, C++, Java, JavaScript), software development, computer architecture, networks, operating systems, and database management.

Diploma in Project Management | UCD Professional Academy, Ireland

November 2025 – February 2026

- An extensive Project Management diploma focusing on Scope, Cost, Schedule, Resource, Communication, Risk, Stakeholder and Agile management.

Diploma in Sales Management | UCD Professional Academy, Ireland

January 2026 – Present

- A comprehensive programme that focused on the modern sales ecosystem through data-driven strategy, buyer psychology, CRM optimization, and the ILAER lifecycle and scalable revenue and stakeholder value.

CERTIFICATIONS

Learn microservices with .NET core | Udemy | [Certificate](#)

Complete guide to building an app with .NET core and React | Udemy | [Certificate](#)

PROJECTS

Thesis | Clericus Population analysis web application

September 2022 – June 2023

- Developed an interactive web application using **React**, **deck.gl**, and **Mapbox** to analyze the clerical population of Ireland.
- Conducted extensive UX research (User Personas, User Stories, Diary Studies, Surveys) to inform iterative design and development.
- Applied advanced software development methodologies, architectural principles, and design patterns.

SKILLS

- **Backend & Frameworks:** C#, .NET, .NET Core, ASP.NET, Ocelot (Microservices), SignalR, Rabbit MQ, Kafka, Python, Go, Gin, Java
- **Databases:** SQL, MongoDB, AWS DynamoDB
- **Frontend:** HTML5, CSS3, JavaScript, React, Redux, TypeScript, Vite, Chakra-UI, Bootstrap, [ASP.NET](#) Web Forms, Angular, [d3.js](#), [deck.gl](#), Mapbox, Jest, React-native
- **Cloud & DevOps:** AWS, Docker, Azure DevOps, Appveyor, Git, Splunk, Consul, Jira, SonarCube
- **Product:** Project Management, Agile management, Sales Engineering, Technical sales

Soft Skills:

- Problem Solving, Attention to Detail, Time Management, Decision Making.
